

Acrobat Pro DC - Introduction

Course #: AA-200 **Duration:** 1 day

Prerequisites

To ensure your success in this course, you should have basic experience with computers and exposure to Windows as well as common productivity tools such as Microsoft Word and Microsoft PowerPoint.

Details

Adobe Acrobat Pro DC Introduction is a comprehensive one-day class that covers the fundamentals of working with PDFs, including creating, editing, and enhancing documents. Participants will learn to navigate the Acrobat interface, convert various file types to PDF, organize pages, add interactivity, and improve accessibility. The course also covers essential features like reviewing and commenting, basic security measures, and form creation. Additionally, students will explore collaboration tools, learn to optimize PDFs, and gain an understanding of how Acrobat integrates with other Adobe products. By the end of the day, attendees will have a solid foundation in using Acrobat Pro DC for everyday tasks and basic document management.

Software Needed

- Adobe® Acrobat® Pro DC
- Microsoft® Office

Outline
