

## Excel Advanced

**Course #:** ME-102      **Duration:** 1 day

### Prerequisites

Excel Intermediate (2013, 2016, 2019, Office 365)

### Details

In this course, students will further build on the skills acquired in the Microsoft Excel Introduction and Intermediate courses. They will work with advanced functions and formulas, as well as lookup functions such as VLOOKUP, MATCH, and INDEX. In addition, students will learn about data validation and will use advanced data filtering. They will apply advanced chart formatting options, and create more complex charts. They will work with PivotTables and PivotCharts, export and import data, and query external databases. Students will learn about the analytical features of Excel, such as Goal Seek, and how to create scenarios. Finally, they will run and record macros, and explore VBA code.

This course will help students prepare for both the Microsoft Office Specialist core-level exam and the Microsoft Office Specialist Expert exam for Excel. For comprehensive certification training, students should complete the Introduction, Intermediate, and Advanced courses for Excel.

### Software Needed

Microsoft Office 2013 or higher (2013, 2016, 2019, or Office 365)

### Outline
