

Excel Introduction

Course #: ME-100 **Duration:** 1 day

Prerequisites

None.

Details

This course will familiarize students with spreadsheet terminology and the fundamental concepts of Microsoft Excel, including identifying Excel window components, navigating worksheets, and downloading templates. In addition, students will learn the basics of entering and editing text, values, and formulas, and how to save workbooks in the native Excel format, as well as in other formats. They will learn how to move and copy data and formulas, how to determine absolute and relative references, and how to work with ranges, rows, and columns. Students will also learn how to use simple functions, and how to easily apply formatting techniques to worksheet data. They will create and modify charts, and work with graphics. Finally, they will review workbooks for spelling errors, modify page setup, and print worksheets.

This course will help students prepare for both the Microsoft Office Specialist core-level exam and the Microsoft Office Specialist Expert exam for Excel. For comprehensive certification training, students should complete the Introduction, Intermediate, and Advanced courses for Excel.

Software Needed

Microsoft Office 2013 or higher (2013, 2016, 2019, or Office 365)

Outline

Excel Introduction (2013, 2016, 2019, Office 365)
